

KANGAROO

Available as	Full skins
Average hide size	.5sqmt
Thickness	.8—1mm
Leather type	Full Grain

Kangaroo leather has the highest tensile strength of any hide leather which makes it super strong and versatile.

Images are an indication of colour and finish. Colours will vary between hides and this should be considered in end use specification.

Leather is a natural product. Each hide will have it's own unique characteristics. Markings such as growth lines, healed scars, insect bites, scratches will be featured on this leather.

Keep leather away from direct sunlight and direct heat sources. This leather does not have any protective coatings and will be susceptible to fading or discolouring.

Gently remove any spills or marks by wiping with a clean cloth. Do not scrub the surface of the leather or immerse in liquid.

Test leather cleaning products on an inconspicuous area prior to cleaning.
